(54) METHOD AND DEVICE FOR VIDEO RECORDING AND REPRODUCTION PROCESSING, AND VIDEO RECORDING AND REPRODUCTION PROCESSING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To easily select and reproduce a desired video recording program from among video recording programs recorded as digital data.

SOLUTION: This video recording and reproduction system is provided with a video recording reservation instructing means 24 that instructs video recording of a program to a video recording and reproduction device 4, generates video recording contents data that makes cross-reference EPG data as to a selected program, in the case of video recording and a storage location of the digital data recording the program, and stores the data to a video recording contents storage section 33 and with a reproduction retrieval means 25 that retrieves the video recording contents storage section 33, on the basis of a keyword to specify the program, selects a video recording program specified by the keyword and acquires the storage location of the digital data of the video recording program, in the case of reproduction.

## LEGAL STATUS

[Date of request for examination] 09.08.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3456176

[Date of registration] 01.08.2003

[Number of appeal against examiner's decision  
of rejection]

[Date of requesting appeal against examiner's  
decision of rejection]

[Date of extinction of right]
